Pursuing B.S. in Applied Engineering and General Technology Management, Concentration in General Technology

EXPERIENCE

AboveAir Technologies

Frederick, MD

Engineering & Manufacturing Management Intern

May 2026 – Present

- **Project Leadership:** Assumed direct accountability for several technical projects, leading teams from scope through execution and using KPI frameworks to evaluate performance across management and hourly staff
- **Time & Motion Studies:** Conducted time and motion studies and improved workflow, reducing assembly lead times by 9% and eliminating key bottlenecks
- **Continuous Improvement:** Implemented 5S walks and Kaizen methodologies on the production floor, fabricating customized workstations that reduced material waste by 5% and saved \$11,300 annually
- **Quality Assurance:** Developed and deployed standardized inspection checklists across 3 production lines, reducing manufacturing defect rates by 25%
- **Production Control:** Coordinated production planning, scheduling, and inventory control for 3 active production lines improving production by 15%
- **Manufacturing KPIs:** Designed tracking tools for critical production metrics, including cycle time, scrap, and cost, saving \$3,000 annually

Knorr Bremse

Westminster, MD

Technology Assembler

Nov 2023 – Sep 2024

- Assembled mechanical and electromechanical components according to blueprints, consistently meeting or exceeding daily production quotas by 10% while maintaining zero-defect quality standards
